## York and Brazil Ship Schedules: How to Identify which Plant Sent the Ship Schedule

If your company receives ship schedules (EDI 862) from York and Brazil, you will want to read this Electronic Commerce (EC) Tip. As many suppliers know, it can be confusing to determine which plant sent the ship schedule. It is not realized that the assumption was incorrect until the ASN is rejected and an ASN Edit Report is received stating that the “Release ID is invalid for the plant” or “PO Number is invalid”.

This EC Tip will list important differences between York and Brazil ship schedules. With this information, the supplier can incorporate the appropriate information into their ship schedule and ASN processes to avoid having an ASN rejected.

It is important to note that York and Brazil order the *same* part number. Therefore the following information is important to know:

- York PO numbers begin with a letter **R**.
- Brazil PO numbers begin with a letter **B**.
- York Ship Schedules will contain a schedule issuer code of **062629324**.
- Brazil Ship Schedules will contain a schedule issuer code of **7178522171**.
- York and Brazil both ship to the MVC, **7178521878**.
- York has material shipped to two locations: **062629324** (York) or **7178521878** (MVC)
- Brazil has material shipped to two locations: **7178522171** (Brazil) or **7178521878** (MVC)

- Each plant will send its own ship schedule.
- An ASN having a schedule issuer code of York (062629324) can not contain a Brazil PO number or release ID.
- An ASN having a schedule issuer code of Brazil (7178522171) can not contain a York PO number or release ID.
- ASN processes should know that York and Brazil utilize the same ship to location of the MVC, 7178521878 .
- The ASN process can not assume that if the ship to location equals 7178521878 (MVC) that the schedule issuer is York. *This is an incorrect assumption.*

If the above important information is incorporated into the ship schedule and ASN processes, an assumption can be made that the ASN will be accepted.

If you have any questions regarding this EC tip or any H-D EDI/Bar Coding business requirement, you may contact Kelly Barbara at telephone number (717) 852-6526 or at email address [Kelly.barbara@harley-davidson.com](mailto:Kelly.barbara@harley-davidson.com).

	York	Brazil
Schedule Issuer Code (N1 SI Segment)	062629324	7178522171
Ship To Locations N1 ST Segment		
York Plant	062629324	
Brazil Plant		7178522171
Material Velocity Center (MVC)	7178521878	7178521878
PO # Begins with	R	B
